

SCULPTURE™ Seating

Shown with plastic base and partial pivot arms with width adjustment.

Shown with polished aluminum base and partial pivot arms.

Shown with painted aluminum base and 360° pivot arms.

Finally a chair that truly moves with you. Sculpture Seating is designed to provide the ultimate in back comfort. And when your back is comfortable, the rest of you is comfortable. With adjustable lumbar support and a back split into two independent parts, Sculpture provides continuous support to your lower and upper back, moving the way your back moves. This flexibility is key to superior comfort.

Seat height and depth can be easily adjusted. The tilt tension control lets you select your level of support. You can choose from four armrest options, plus, all Sculpture chairs use soft, durable memory seat foam. All of these adjustment options change the way your chair relates to your body. In addition to state-of-the-art comfort, Sculpture is visually stunning, too. Elegant curves and polished or powder coat painted aluminum separates this chair from all others.

Sculpture arm options range from height/width and partial pivot to the simple fixed arm. (See price list).

Sculpture seat height adjusts between 16-20 3/8" to accommodate all users.

The lumbar adjustment has a 2-3/4" range. Simply reach back with both hands and grasp the lumbar. Move up or down to desired position.

Back tilt tension knob adjusts back tension to users satisfaction. Turn clockwise to increase tension, counter clockwise to decrease tension.

SCULPTURE™ Seating

Shown with painted aluminum base and fixed arms.

Shown with painted aluminum base and no arms.

Comfort is king. That's why Sculpture features so many options and adjustment possibilities. The seat can be tilted to the proper position, slid forward or back (achieving a depth from 16" to 19"), and a variable back angle lock lets you choose the degree of recline. Of course, the pneumatic seat height adjustment puts you on the right level for any task.

Four armrest options keep your upper body as relaxed as

your lower half: fixed arm supports; 4" height adjustable with 360° pivot; 4" height adjustable with 30" pivot; 4 1/2" width adjustable. You can even get Sculpture without armrests. Two base options are available—die cast aluminum or flannel injection molded nylon. With these options and this level of craftsmanship, Sculpture could carry a hefty price tag, but these chairs are available for a surprisingly modest price.

Back angle articulation adjusts 6° forward and 10° backward providing an exceptional range of comfort.

Durable back supports also offer the modern design that meets today's tastes.

The forward seat tilt feature adjusts from a locked +2° to an unlocked -2°, along with a waterfall seat cushion, stress on your legs is virtually eliminated.

The 5 position seat slide lockout feature allows users of all sizes the ability to adjust the seat providing multiple seating comfort options.
